

Lesson 02 Demo 07

Working with ng-app Directive

Objective: To create an HTML file to demonstrate the usage of the ng-app directive

Tools required: Ubuntu, Visual Studio, and Node.js

Prerequisites: Knowledge of JavaScript, TypeScript, and Node.js

Steps to be followed:

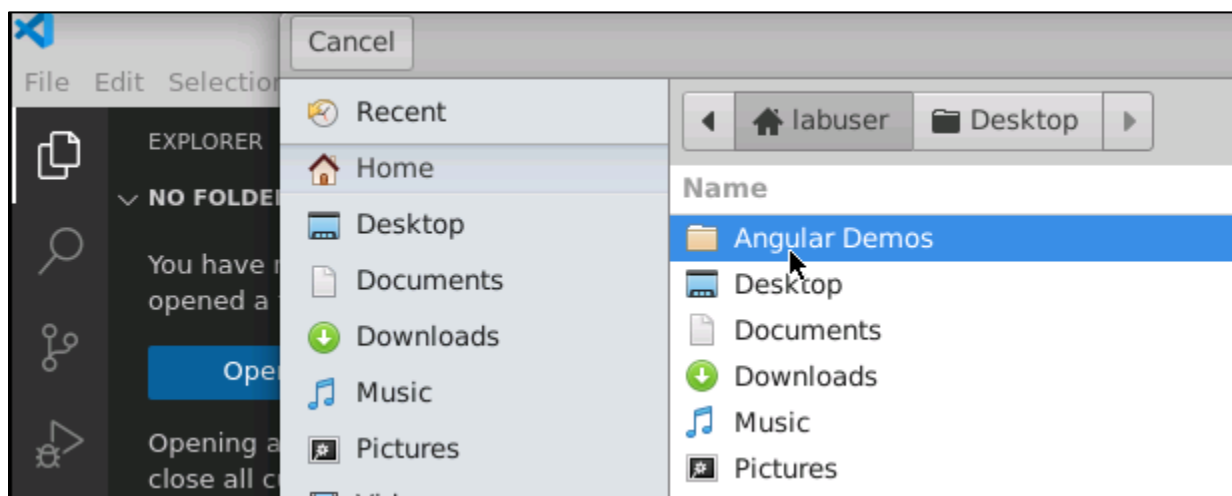

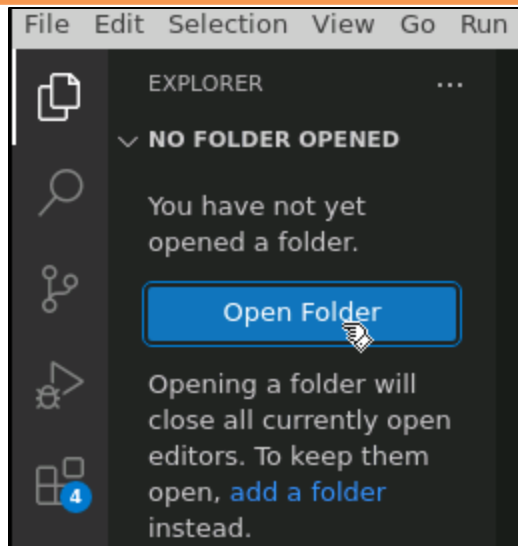

1. Creating an HTML file to demonstrate the usage of the ng-app directive

Step 1: Creating an HTML file to demonstrate the usage of the ng-app directive

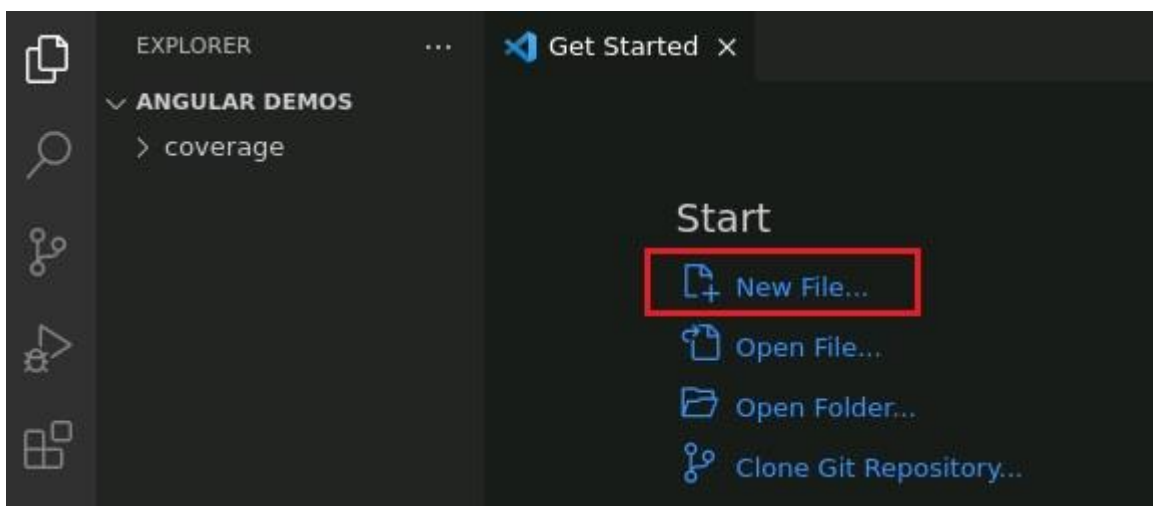

1.1 Create a folder for the angular files

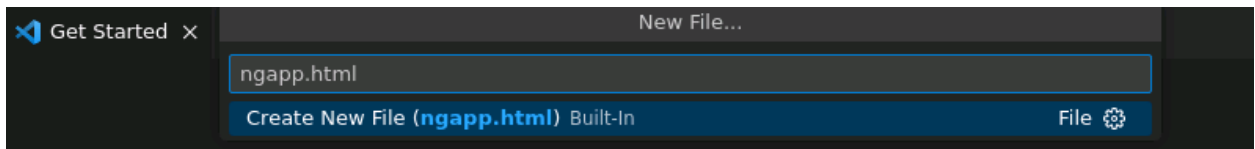

1.2 Open **Visual Studio** IDE, click on **Open Folder**, select the folder, and click on **Open**

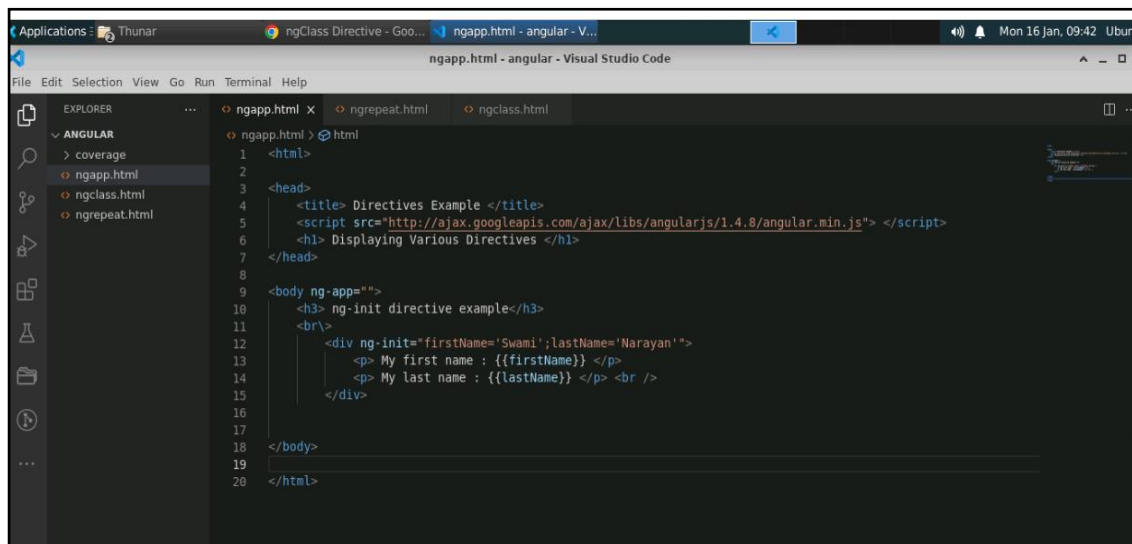

1.3 Click on **New File** and enter the name **ngapp.html** as shown below:

1.4 Add the following code in the html file and save it:

```
<html>
<head>
  <title> Directives Example </title>
  <script src="http://ajax.googleapis.com/ajax/libs/angularjs/1.4.8/angular.min.js">
</script>
  <h1> Displaying Various Directives </h1>
</head>
<body ng-app="">
  <h3> ng-init directive example</h3>
  <br\>
  <div ng-init="firstName='Swami';lastName='Narayan'">
    <p> My first name : {{firstName}} </p>
    <p> My last name : {{lastName}} </p> <br />
  </div>
</body>
</html>
```

```

1 <html>
2
3 <head>
4   <title> Directives Example </title>
5   <script src="http://ajax.googleapis.com/ajax/libs/angularjs/1.4.8/angular.min.js"> </script>
6   <h1> Displaying Various Directives </h1>
7 </head>
8
9 <body ng-app="">
10  <h3> ng-init directive example</h3>
11  <br>
12  <div ng-init="firstName='Swami';lastName='Narayan'">
13    <p> My first name : {{firstName}} </p>
14    <p> My last name : {{lastName}} </p> <br />
15  </div>
16
17 </body>
18
19 </html>
20

```

1.5 Now, run the code in the browser to view the output
