

Lesson 01 Demo 02

Adding Title, Headings, and Paragraphs in the Web Page

Objective: To develop a web page that includes a title, headings, and paragraphs

Tools required: Visual Studio Code, Browser

Prerequisites: None

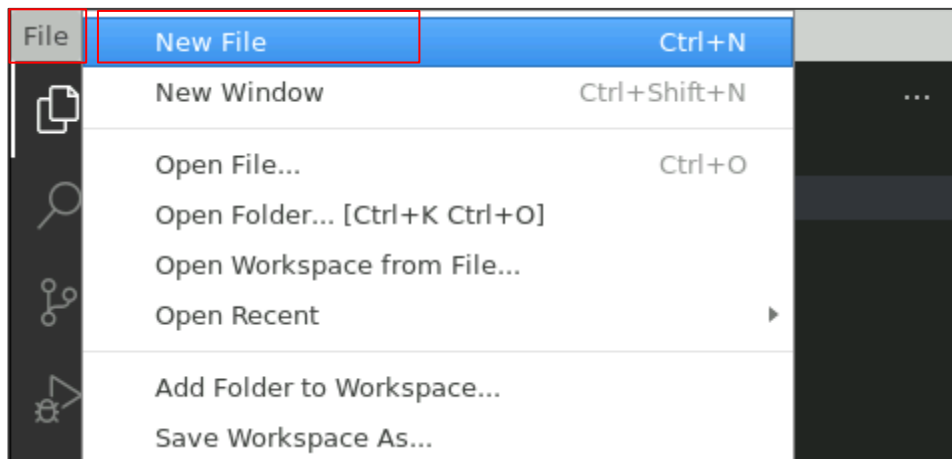

Steps to be followed:

1. Create the index.html file
2. Add titles, headings, and paragraphs in the web page
3. View the results in your local browser

Step 1: Create the index.html file

- 1.1 Open **Visual Studio Code**, right-click on the **File** menu in the code editor, and select **New File**

1.2 Create a file named **index.html**

Step 2: Add titles, headings, and paragraphs in the index.html file

2.1 Enter the following code to view the title, heading, and paragraph in the web page:

```
<!DOCTYPE html>
```

```
<html lang="en">
```

```
<head>
```

```
<!--Code for the title-->
```

```
<title>This is the TITLE</title>
```

```
</head>
```

```
<body>
```

```
<!--Code for the headings-->
```

```
<h1>This is my Web page</h1>
```

```
<h2>This is my Web page</h2>  
<h3>This is my Web page</h3>  
<h4>This is my Web page</h4>  
<h5>This is my Web page</h5>  
<h6>This is my Web page</h6> <br>
```

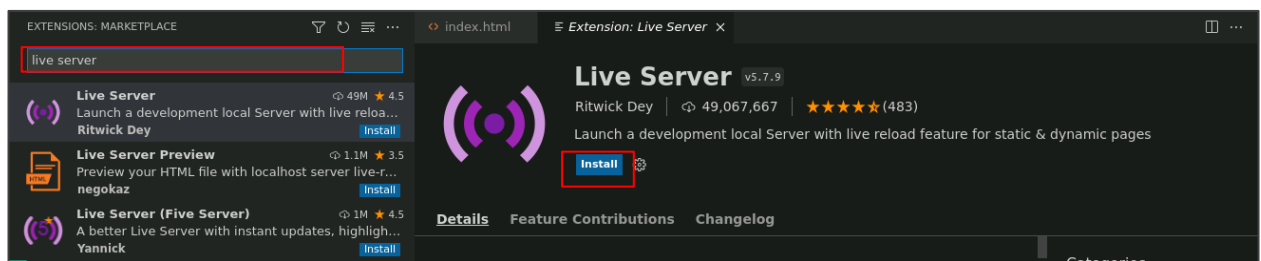

```
<!--Code for the paragraph-->
```

```
<p>This is the Web page. <strong>HTML is used to develop web pages. </strong></p>  
</body>  
</html>
```

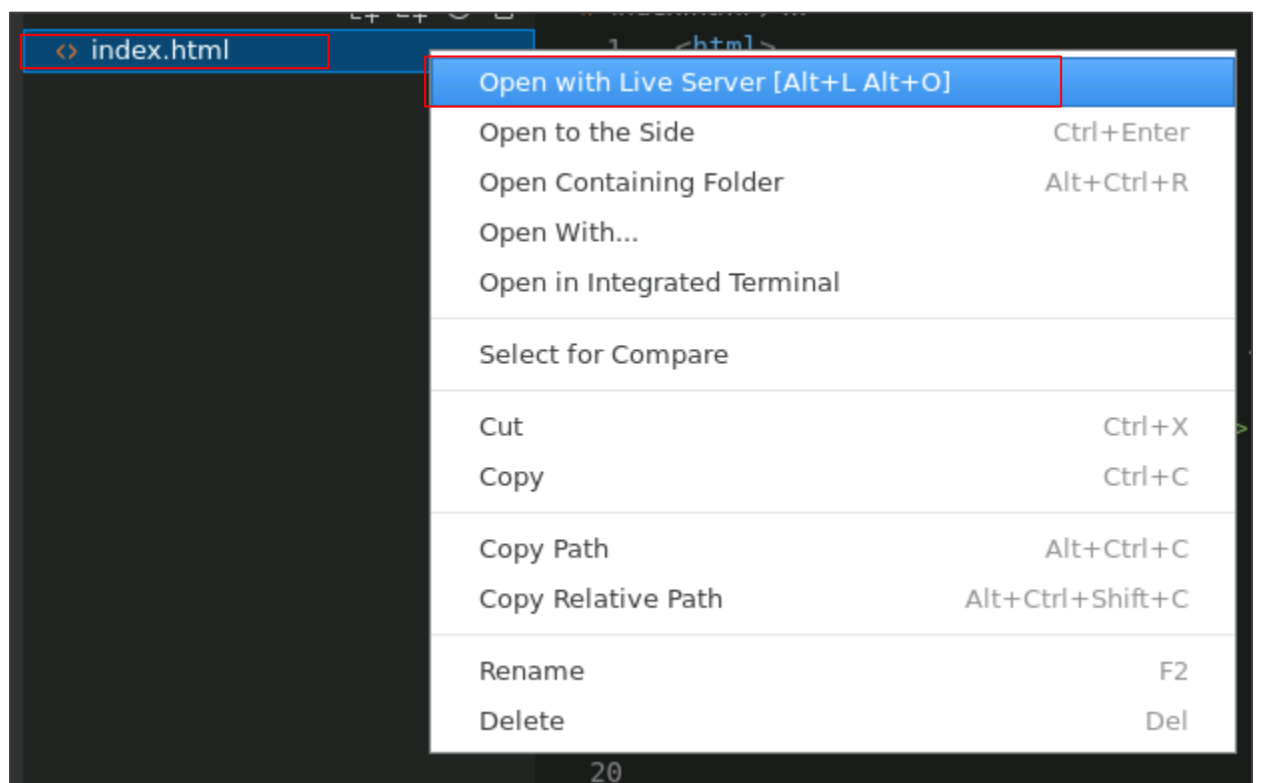

Step 3: View the results in your local browser

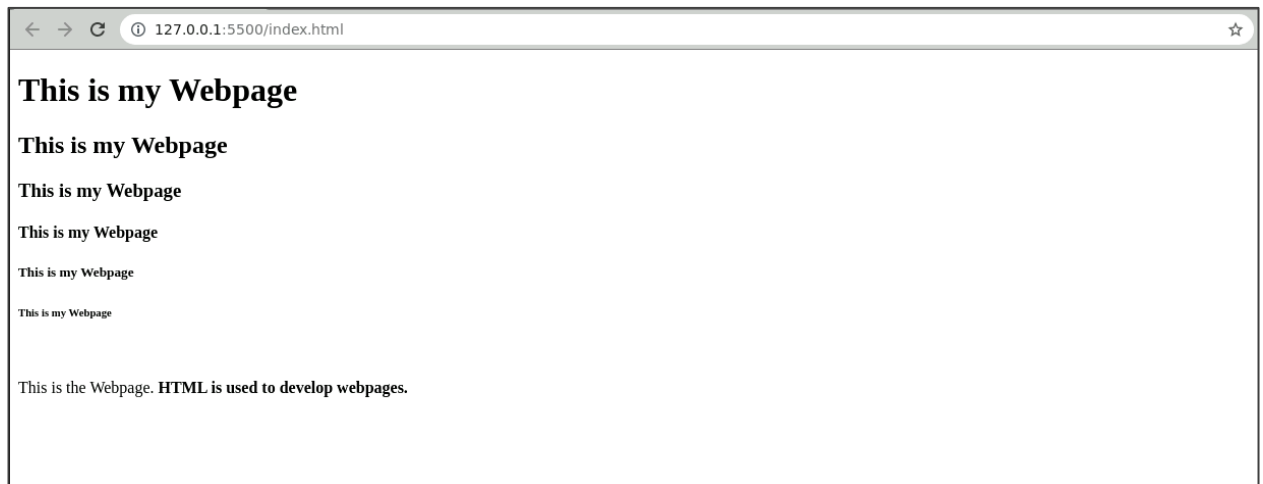

3.1 Go to **Extensions** in Visual Studio Code, search for **Live Server**, and **install** it

3.2 Right-click on the **index.html** file of the project, select **Open with Live Server**, and the output obtained will be as shown below:

By following these steps, you have successfully developed a web page that includes a title, headings, and paragraphs.
