Lesson 04 Demo 02

Creating User Stories in Jira

Objective: To create user stories in Jira

Tools required: Jira
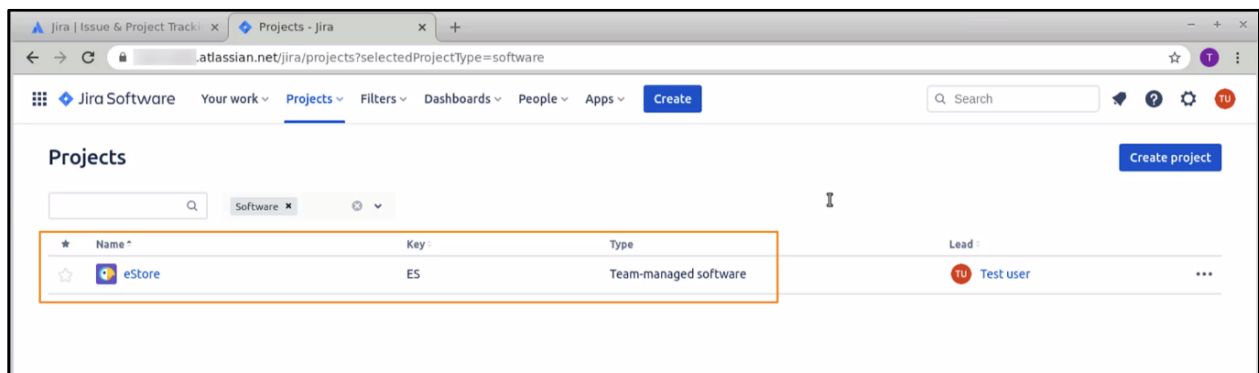

Prerequisites: Refer Lesson 4 Demo 1
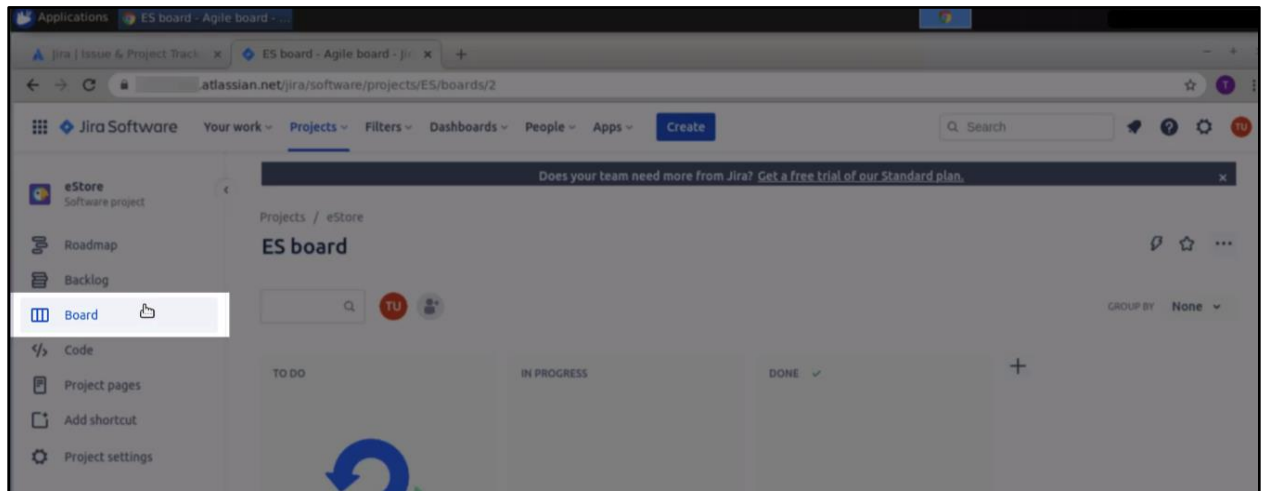

Steps to be followed:

1. Navigating to the Jira Software Tool
2. Creating User Stories

Step 1: Navigating to the Jira Software Tool

1.1 Ensure that the **eStore** project has already been created

1.2 Open the **eStore** project to access the **Board**

Step 2: Creating User Stories
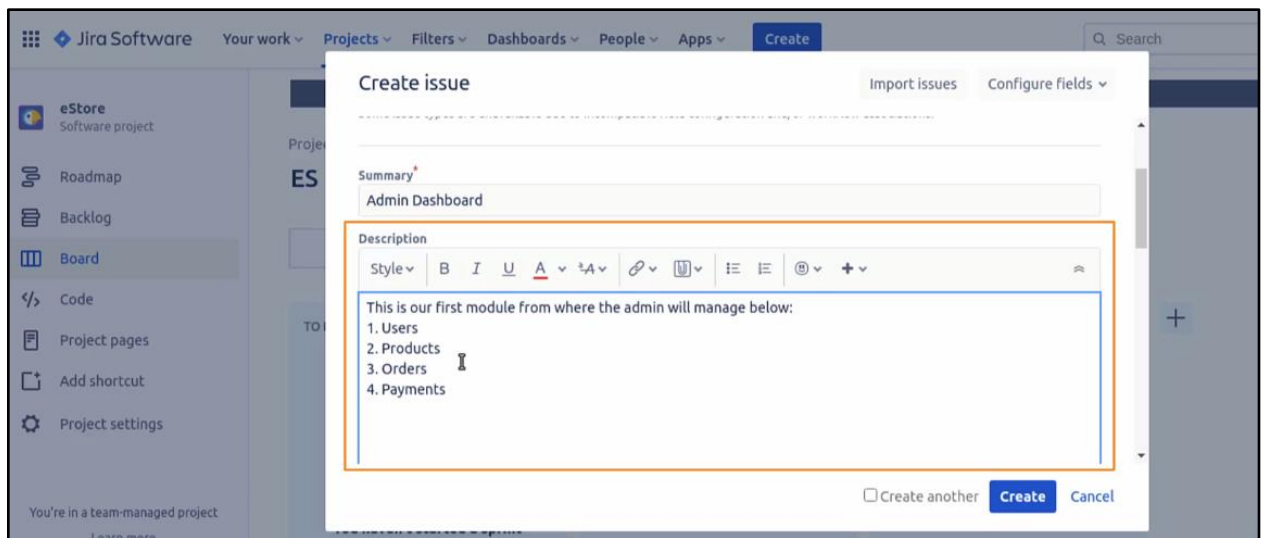

2.1 Click on the **Create** button

Note: Divide the E-commerce application into two parts: an Admin Dashboard with project details and an End-user Application for browsing projects.
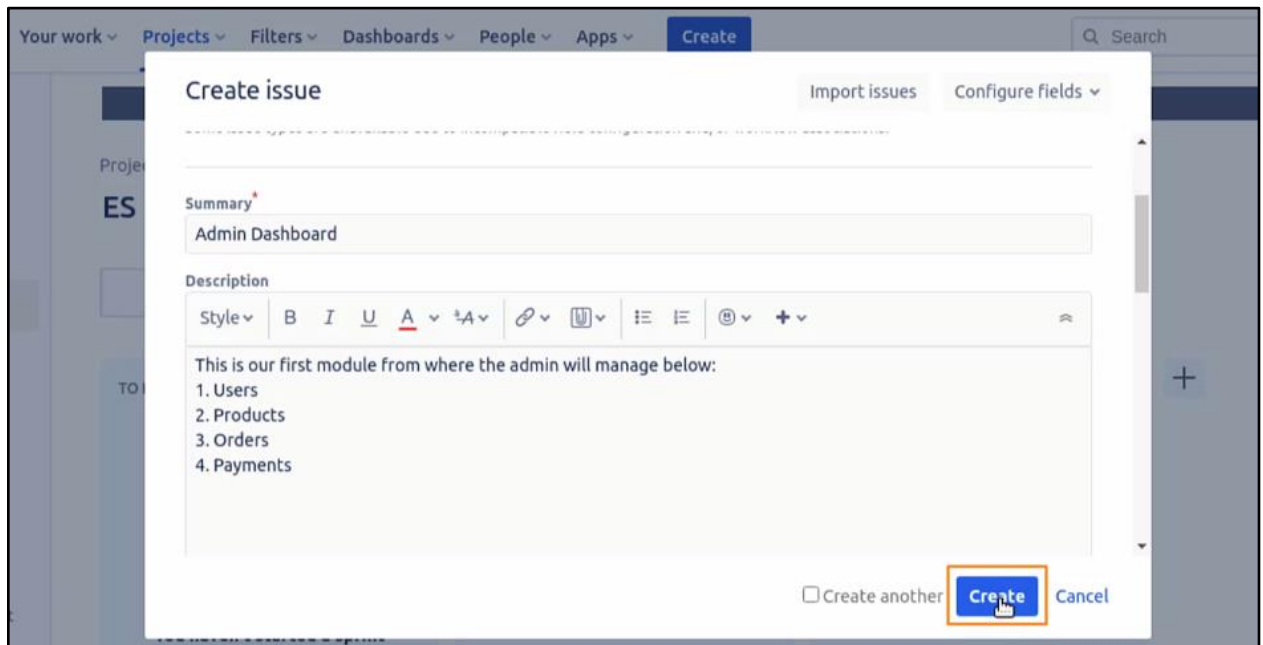

2.2 In the **Issue Type** dropdown menu select **Epic**

2.3 Enter **Admin Dashboard** in the **Summary** field and provide a description as:

    1. Users

    2. Products

    3. Orders
    4. Payments

2.4 Click on the **Create** button

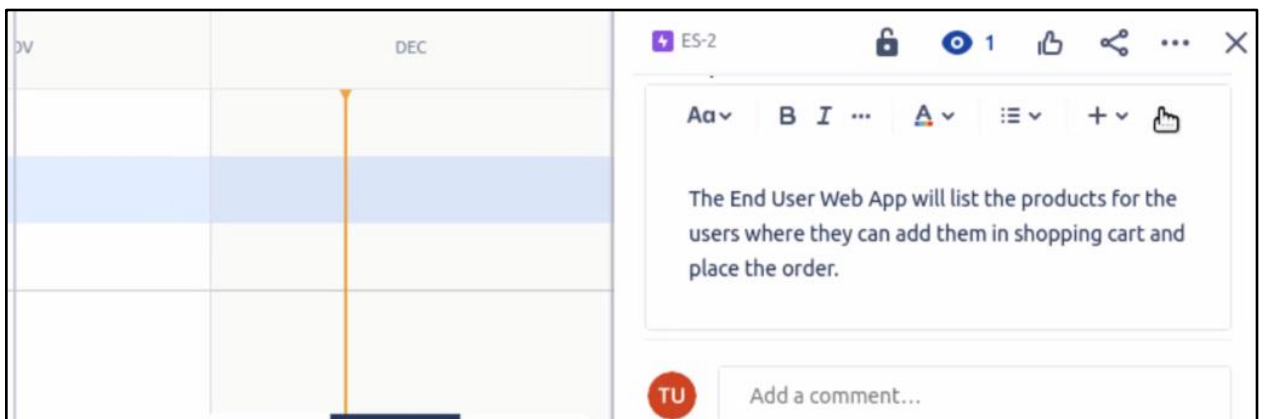

2.5 Click on **Roadmap**

Note: The Epics created are not displayed on the board but can be found within the Roadmap.

2.6 Click on the **Create Epic** button to create another Epic directly from the **Roadmap**

2.7 On the right-hand side, add all the necessary descriptions for the End-user Web App

**Note**: The descriptions are automatically saved as they are entered.

2.8 Go to **Epic** and click on the **+** icon to create the User Stories

2.9 Change the **Issue Type** to **Story** and provide a **Summary** and a **Description**

2.10 Add further details, such as **Description**, **Acceptance Criteria**, **Validations, and Non-functional Requirements**

2.11 Scroll down, link the story to the relevant issues, and click on the **Create** button

2.12 A prompt will appear confirming the creation of the User Story

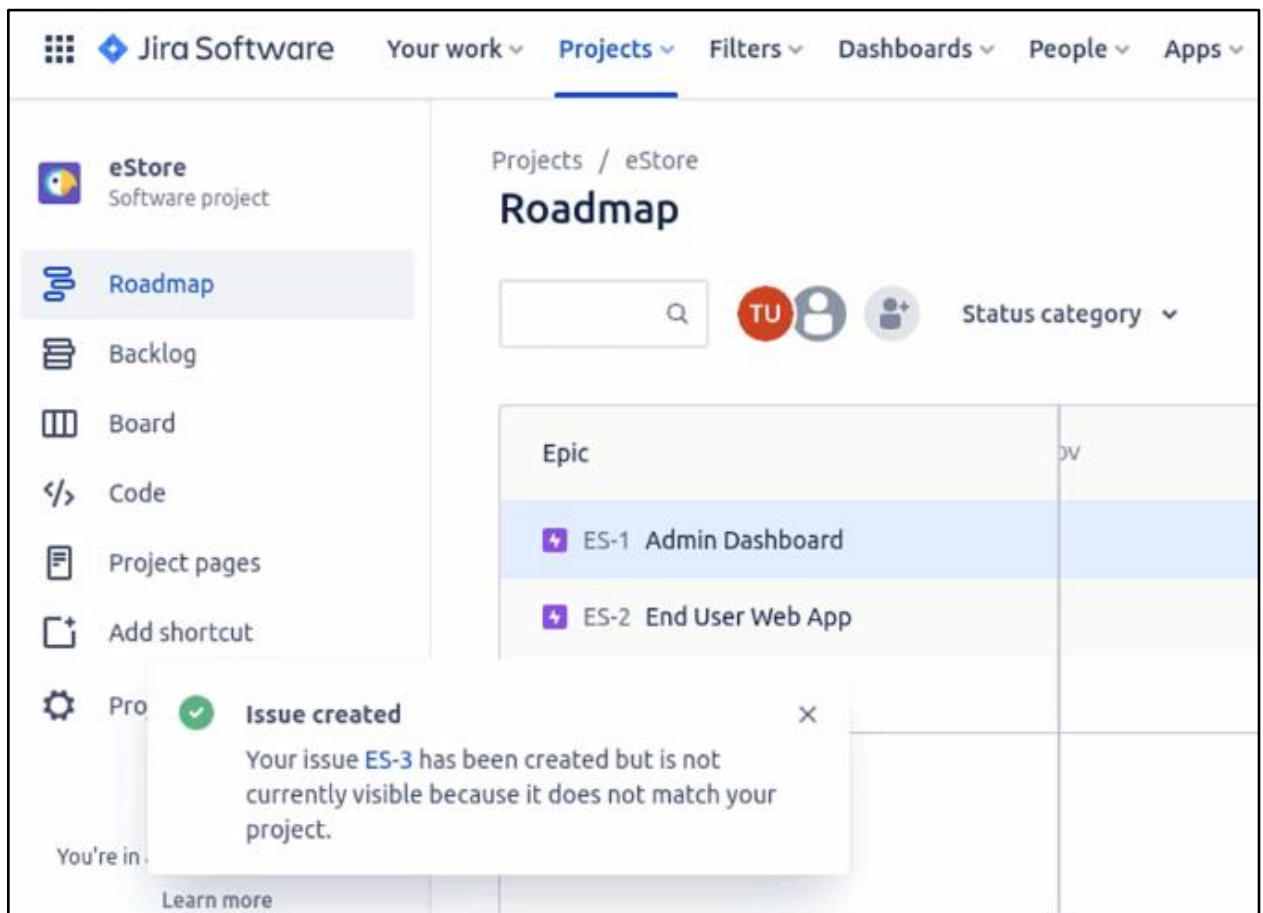

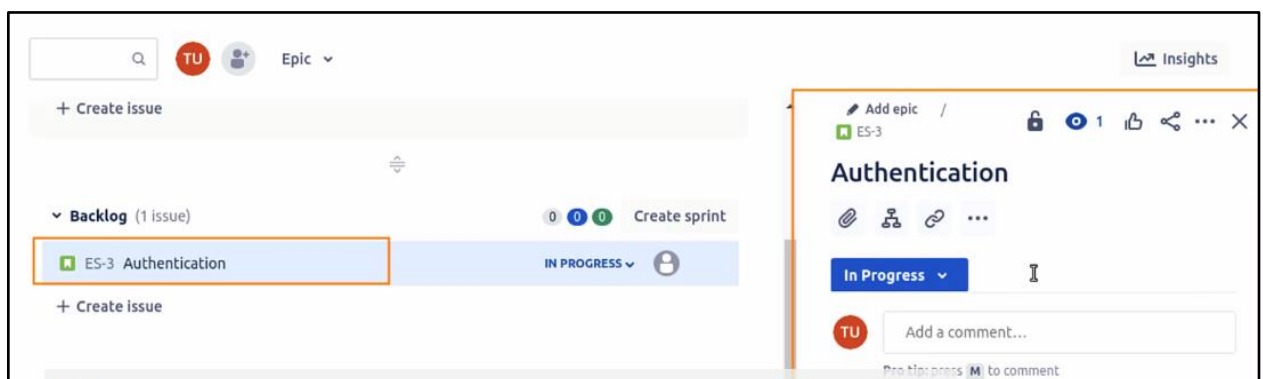

2.13 Navigate to the **Backlog**, where you will find the **Authentication** story. Click on it and move it to **In Progress.**

By following these steps you have successfully created user stories in Jira.
